

SQUARE-TRACK™ *System*

Square track is designed for flexibility and economy in sliding door systems weighing up to 400 lbs. Suitable for use indoors or out, square track can be installed with or without a cover in top mount, face mount, and double-run face mount configurations.

Manufactured from 16 gauge galvanized steel, square track is available in lengths from 8 foot to 12 foot.

All models of square track are compatible with our full family of non-bearing, Delrin bearing, and roller bearing trolley hangers.
